

1600W solar charging panel

The original plan was to use the three Ecoflow components in my RV in the summer and transfer them to my house in the winter to offset electrical costs with a DIY solar array, but it is turning into a maze of confusion for something that should be super simple. 10.8 kWh storage is likely a perfect size for a small house to cut back a significant portion of the electric bill so it ...

I will connect 4pcs 540W panel to my Delta Pro as a 2x22 grid with 100V and 20Amp, but with the limit of the DeltaPro to be 15Amp I can charge only with 1500W. Now I ask myself, instead of using Grid power to raise the charging - If I just use a 2KW inverter and connect that to the 220V input -...

I am planning on using a 24V all in one Growatt 3000 watt inverter, with 2 Battle 24 volt batteries for now (possibly expanding to 4 of those batteries later.) I initially thought about running each panel separately to a Midnite Solar combiner box and fusing each one separately in the box. Each panel has a 20 amp max fuse size recommendation.
