

2 degree outdoor power supply 2025 model recommendation

What will dominate the global power landscape in 2025?

According to Power Technology parent company GlobalData's Power Predictions 2025 report, several key themes are set to dominate the global power landscape this year, from geopolitical shifts affecting supply chains to advancements in electric vehicles (EVs), energy storage, nuclear power and hydrogen.

What to expect from the power sector in 2025?

GlobalData's recent report outlines what to expect from the power sector in 2025. Credit: Amgun via Getty Images. As the world transitions toward cleaner energy sources and grapples with critical political shifts, 2025 is shaping up to be a pivotal year for the power sector.

How much energy will the electric power industry use in 2060?

In 2030 and 2060, the RESs (i.e., wind and solar power) would exceed 1600 GW and 6300 GW with more than 2500 TWh and 11,000 TWh electricity generation, respectively. Besides, the rate of non-fossil fuel energy consumption in the electric power industry would reach 44.8% in 2030 and 87.53% in 2060 (see Table 2).

Will nuclear energy reach a new record high in 2025?

Nuclear generation will reach a new record high in 2025, driven by a recovery in output in France and Japan, and new reactors entering operation in China, India and Korea, among other countries. Nuclear energy will continue to set a new record every year thereafter.

Will the nuclear industry continue its growth trajectory in 2025?

Regardless, the nuclear industry is expected to continue its growth trajectory. GlobalData forecasts that total nuclear power generation will reach 2.67 terawatt-hours in 2025 with 5GW of capacity additions - more than five times the 989MW added in 2023.

How many MTPA will green hydrogen produce in 2025?

According to GlobalData, global green hydrogen production capacity is expected to reach 2.76 million tonnes per annum (mtpa) by the end of 2025, compared with 270,000 tpa registered this year. North America holds the leading position in the global hydrogen market.
