An inverter is used to produce an un-interrupted 220V AC or 110V AC (depending on the line voltage of the particular country) supply to the device connected as the load at the output socket. The inverter gives constant AC voltage at its output socket when the AC mains power supply is not available. Let's look at how the inverter makes this possible.

Electric suction unit is the new generation oil-free medical suction unit with negative pressure pump. Oil-free piston pump helps to keep from oil mist pollution. Plastic panel makes it resistant from water erosion. Low noise, easy to operate with manual and pedal switches. Overflow valve helps to prevent liquid from flowing into pump.
