What is a three-phase online modular uninterruptible power supply system?

Three-Phase online modular uninterruptible power supply systems from the Modulon UPS family offer scalability and redundancy in a single frame, with up to 600 kVA. Delta's UPSs are some of the most advanced in the industry, renowned for their innovation, reliability, and efficiency.

What is a Delta ups?

With its wide range of Uninterruptible Power Supplies (UPS), Delta offers a competitive edge to businesses in need of first-rate power solutions. Delta UPSs are designed to ensure that companies can protect their mission critical applications by maintaining a steady flow of energy under adverse circumstances.

What is an uninterruptible power supply?

An uninterruptible power supply is an electrical apparatus designed to furnish emergency power even when other sources of input power fail, and they are indispensable tools within a huge number of unrelated industries.

Why should a business use a Delta ups?

Delta UPSs are known for efficiency and for saving not just energy, but money that would be wasted by less advanced devices that require too much power. The growth of a business should never be at risk of limitation or delay due to avoidable technical restrictions of existing power hardware.

Why should you choose delta power supply units?

The Delta line of uninterruptible power supply units includes superb options trusted by leading organizations across a wide array of industries, from financial institutions to medical centers. Small business owners also look to Delta for power solutions that keep their vital equipment running no matter what happens.

A UPS system is different than generator in the way it provides power supply. The advantage with UPS is that it protects from loss of power immediately without the interruption of power. The energy used to supply power is stored in the backup batteries, super-capacitors and flywheels.
