60 and 72v inverter

Mastervolt sine wave inverters can deliver high peak power (up to 200 %) to equipment that requires extra current for a short period of time while powering up. Simple and safe to connect. The inverters feature robust connection technology, internal in the larger models and a plug & play socket with cable for the smaller models.

The idea would be to use a transfer switch to change between grid or battery power. For this to work with the existing panel, it would be necessary to have split phase 120-0-120V AC output from the inverter. Does anyone know of 72V inverters that can do this (either with one inverter, or two inverters wired together)? Thanks in advance!
