How do I get 220V from a 110 volt inverter?

You would have to get a step-up transformer (perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters? Aloha, Can I parallel two of the same MSW inverters @110v each and get 220v single phase? If so, then would I tie the two neutrals together? Reference my system below. thanks

Can a 240V inverter be connected to a 120V volt?

The trick is if you have any 240vac loads they could have any voltage from 0 to 240v as the two inverters won't likely be in sync or stay in sync with one another, even matching ones. All devices will be 120V, no 240V appliances, so no problem there.
