A BMS - battery management system is considered the actual brain of the battery and when designed with cutting-edge electronics, it performs numerous other functions that control and monitor the behaviour of the lithium battery inside the application in real time.

Prices typically range from \$20 to \$100. Active BMS: More sophisticated than passive systems, active BMS options either balance or take energy from stronger cells, ...

It's true, I am a bit shocked at the higher end prices of BMS. But I am making a substantial investment in my battery, and the raw cells were (relatively) cheap considering their capacity, so it will be worth it to find something that will coddle those cells. ...
