

What are the benefits of solar PV power in Iraq?

With abundant sunlight, solar PV power offers a safe, reliable, and sustainable energy supply. Let's maximize the benefits of the sun for all in Iraq! Experts for training of PV engineers, PV sales engineers & PV technicians Equipped with the latest technology and hardware Innovative approaches to tackle energy management

Who is Sunway solar?

As a leading solar system supplier, Sunway Solar specializes in offering excellent products related to solar power, from solar PV panels to solar systems. Solar Panel (Solar PV Panel: Mono/Poly/Perc/Half) Wide range of power options, bringing higher power and better generation capacity and reliability. Solar Battery

Who is betel energy?

BeTel Energy is a Solar company based in Erbil-Iraq, it provides a variety of solar PV, clean and green energy products and services and suppliers, it provides Solar installation services for residential and commercial uses, and it offers qualified and efficient equipment with different types of systems depending on the customer needs.

How can a training centre help the Iraqi solar energy sector?

Training centres, equipped with solar PV components and working systems, for practical, hands-on training, have been established in three different locations for empowering the Iraqi solar energy sector: Learn about energy management, energy audits and the potential to reduce consumption and costs in homes, offices, and industry.

Who is sunlid solar innovations?

Phone number: +964 (0)780 600 8150 Sunlid Solar Innovations is a high-end quality solar lights company in Iraq.

We chose SunPower technology because we needed to maximise energy production on a restricted roof space and we needed panels that could be customised to the rooftop's unique design. We also wanted a durable product that lasts longer than standard panels and is produced using sustainably sourced materials.

power output of PV panel with fins was higher than without fins by 1.8~11.8%, and the average electrical efficiency for the PV panel with ridges was 0.3~1.8% higher than the PV panel without fins. An experimental study under natural convection was carried out for PV panels with and without fins (Gotmare et al., 2015).
