

Bosnia and Herzegovina custom-made small household energy storage equipment

Is there a district heating system in Bosnia and Herzegovina?

Large district heating systems exist in Bosnia and Herzegovina in larger cities. There are also a number of small district heating grids, built in smaller cities and towns for schools, buildings or blocks of buildings. However, these systems are often old (more than 30 years) and operate mainly on fossil fuels.

Why is Visoko interested in a district heating system?

The Municipality of Visoko is strongly interested in developing a district heating system and finding a more sustainable solution for heating. As a source of heat, bio-waste as well as waste heat from the Power plant Kakanj, which can operate in co-firing (coal-biomass) regimes and is situated 9 km from the town, is considered.

What is the gas supply network in Visoko?

The total gas supply network in the Municipality of Visoko is 91,138 m, of which 69,153 m is laid in public areas. 1. 2. 3. 4. The proportion of the population heated by natural gas compared to other fuels (wood, electricity, pellets and other fuels) is 10:90.

Why is Visoko important?

Having such convenient geographic and economic conditions, the Visoko basin developed into one of the main political, economic and cultural centres of the medieval Bosnia state. Visoko has a status of a royal town, while its name was first mentioned in the 1355 charter issued to the merchants of Dubrovnik by ban Tvrtko I.

Where is Visoko located?

The Municipality of Visoko is situated on the crossroads of the Sarajevo-Zenica industrial region. It is a settlement with an important cultural and historical past. The convenient geographic location, favourable climate conditions, plenty of woods and current waters were the reasons why this area was inhabited ever since the ancient times.
