

Budapest New Energy Storage Policy

How will Hungary support new energy storage projects?

Hungary is aiming to support the installation of at least 800MW/1,600MWh of new energy storage projects through the scheme. The projects will help to integrate new renewable energy resources in its electricity system. The funding is equivalent to HUF 436 billion.

Will Hungary provide grants for energy storage projects in 2025?

The Ministry of Energy in Hungary will provide grants for the deployment of energy storage projects, with some 1GWh targeted by 2025. From June, system operators and distribution companies will be able to apply for subsidies to build energy storage facilities by the summer of 2025 at the latest, the Ministry said.

Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system - a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

How much money is available for energy projects in Hungary?

The funding is equivalent to HUF 436 billion. The money is available for companies active in Hungary's energy sector, except financial institutions, and will also be available for projects outside its borders which can provide the power through cross-border transmission capacity.

Which energy storage companies are deploying large-scale Bess projects in Hungary?

System integrators Tesla and Wärtsilä have deployed large-scale BESS projects in Hungary previously. Energy-Storage.news' publisher Solar Media will host the inaugural Energy Storage Summit Central Eastern Europe on 26-27 September this year.

How much solar capacity does Hungary need?

Hungary has set a target of 12 GW of solar capacity by the start of the next decade. However, grid capacity shortfalls have been dire, hampering primarily the rollout of large-scale solar. The country's revised National Energy and Climate Plan envisages the construction of a total of 1 GW of storage capacity by 2030.

The 6th Budapest LNG Summit is set to take place on 14 April 2025 at Hotel Marriott Budapest, bringing together top energy leaders, industry experts, and policymakers from more than 25 countries. ... Council offers flexibility to member states in gas storage rules. April 11, 2025. Renewables. Fortis Energy to build a hybrid facility in Serbia ...

Hungary's Ministry of Energy announced that around fifty industrial energy storage facilities can be realized due to a recently launched grant program, covering a total capacity of ...

Budapest New Energy Storage Policy

The New Energy Frontier for Europe - Hydrogen in Energy Transition. ... Lajos Erdőslyi, Project manager of major hydrogen-based energy storage projects, Hungarian Gas Storage. Moderator: Annamária ... Director, REKK - Regional Centre for Energy Policy Research. 12.10 - 12.30 Networking Coffee Break 12.30 - 12.40 Keynote Speech ...

The new projects will promote a low-carbon-emissions economy, the transposition to environmental and digital service provision, while contributing to Hungary's energy sovereignty, they added. Battery-based storage facilities will also partially compensate for fluctuations in the output of solar and wind plants, the statement said.

Domestic support for electricity storage may soon increase to more than HUF 300 bln, with several large storage facilities likely to be inaugurated this year, Energy Minister Csaba Lantos said in an interview with business daily Világgazdaság.

On 30 October 2025, leading IPPs, asset owners, and investors active in the Hungarian PV & BESS market will gather in Budapest for the 6th Solarplaza Summit Hungary: PV & Storage. Local and international experts will explore, debate, and consider the de-risking and revenue-enhancing business models energy storage can offer for existing and new ...

Energy storage capacities will double over the next year, with the aim of providing at least 1 GW of storage capacity by 2030. With public funding totalling 33 billion forints (approx. 80 million euros), storage facilities with a ...

The aim of the Regional Centre for Energy Policy Research (REKK) is to provide professional analysis and advice on networked energy markets that are both commercially and environmentally sustainable. ... Beyond Batteries: Exploring Long-Duration Electricity Storage Solutions Knowledge sharing between the United Kingdom and Hungary to enhance ...

The contract with Sinergy KFT, subsidiary of Budapest-based energy company ALTEO Group, includes a lot of firsts. To start with, it's W&rsil's first Engineering, Procurement and Construction (EPC) energy storage project ...

Hungary is set to have the largest green energy storage capacity in the world by 2030, after China, the US and Germany, a government official said, also noting that its climate protection plan announced in 2020 set the goal of producing 90% of the country's electricity from green, carbon dioxide-neutral sources by 2030.

In 2024, the Hungarian government continues to support the growth of residential PV through its newly launched Napenergia Plusz Program, a grant scheme for the installation of modern solar panel...

Hungary's government approved an action plan for the development of the battery industry, which will help

Budapest New Energy Storage Policy

the country to achieve its climate neutrality goal by 2050. ... Council offers flexibility to member states in gas storage ...

On 21 June 2023, the European Commission approved with the decision SA.102428 a Hungarian state aid scheme to support energy storage facilities for the ...

Hungary's government announced a program with a budget of 62 billion forints (163 million euros) encouraging the development of domestic enterprises that increase the flexibility of the electricity system and promote the more efficient use of green energy. ... Council offers flexibility to member states in gas storage rules. April 11, 2025 ...

On July 4, the 2023 Midea Building Technologies New Product Launch took place in Budapest, Hungary. In keeping with the theme "EVER GREEN EVER FORWARD", Midea Building Technologies revealed two significant products - MCube Series Liquid Chiller for Energy Storage System and the next-generation M thermal R290 Nature Series Heat Pump, which ...

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel Murtagh. News April 17, 2025 News April 17, 2025 News April 17, 2025 Premium Features, Analysis, Interviews April 17, 2025 News April 17, ...

Hungary's National Energy Strategy to 2030 is a major step in formulating a long-term vision for the sector. Its main objective is to ensure a sustainable and secure energy sector while supporting the competitiveness of the economy.

The new National Energy Strategy and National Energy and Climate Plan (2030, with an outlook up to 2040) ... o Governance of Energy and Climate Policy under the same Secretariat since mid-2018 o Climate Policy is not (only) a green issue, but a new ... competitiveness of strategic storage facility Developing Romania-Hungary gas ...

In early 2024, the Hungarian government held the battery storage tender, which aimed to enhance the development of large, grid-integrated battery energy storage systems (BESS) by market participants in the country. Read about the key role played by the Hungarian Energy and Public Utility Regulatory Authority (MEKH) in facilitating the battery energy storage in Hungary ...

The Ministry of Energy in Hungary will provide grants for the deployment of energy storage projects, with some 1GWh targeted by 2025. From June, system operators and distribution companies will be able to apply for ...

By streamlining installation and deployment, Teplöre continues to set new standards in energy storage technology. This is just the beginning. As we continue our mission to accelerate the global energy transition,

Budapest New Energy Storage Policy

more projects are on the horizon. Stay tuned as we bring world-class energy storage solutions to Hungary and beyond.

MET Dunai Energiatársulat, a member of the Swiss-based MET Group, is building an energy storage system with a total nominal capacity of 40 megawatts (MW) and a storage capacity of 80 megawatt hours (MWh) in Széchalombatta (near Budapest), for which it has won more than HUF 4 billion (EUR 9.7 million) in non-refundable EU funding.. MET is building the ...

By the second quarter of 2023, the gross amount of licensed electricity storage capacities has reached only about 37 MWh. The aim of the Storage CfD Scheme is to boost ...

Energy system of Hungary. Hungary was among the first countries globally, in June 2020, to make a legal commitment to become carbon neutral by 2050 and plans to phase out coal by 2030 at the latest. Enhanced energy efficiency, increased renewable and nuclear electricity and electrification of end-use sectors are identified as the key drivers ...

Based on the public consultation documents ('Consultation Documents') presented earlier, the Storage CfD Scheme - together with an additional CAPEX support scheme - aims to encourage the development of 885 MWh new electricity storage capacities by the end of 2026. A key element in Hungary's green transition. Hungary set ambitious green energy targets ...

The Ministry of Energy in Hungary will provide grants for the deployment of energy storage projects, with some 1GWh targeted by 2025. From June, system operators and distribution companies will be able to apply for subsidies to build energy storage facilities by the summer of 2025 at the latest, the Ministry said.

III. Hungary's Energy Sector at a Glance 6 As the country is a Member State of the EU, Hungary's energy related policies are significantly shaped by the EU's energy acquis and climate objectives, including concerning green-house gas emission reduction, improving energy efficiency and increasing the use of renewable energy sources ...
