

Canberra Solar PV Panel Assembly

Why should you install solar panels in Canberra?

With the growing need for renewable energy solutions, solar panel installation in Canberra has become a popular choice among homeowners and businesses. Canberra's abundant sunshine makes it an ideal location for solar power systems.

How long does it take to install solar panels in Canberra?

Our SAA-accredited panel installers can usually complete the installation in one day, but the location and size of the solar panels and weather conditions can necessitate additional working days. On average, we complete rooftop solar installations in the city of Canberra within 4 to 8 weeks and a regional installation in 4 to 12 weeks.

What types of solar power systems are available in Canberra?

We offer five levels of solar power systems in Canberra to ensure every customer can generate the amount of solar power that they require. 3kW Solar System : This system size typically includes 8 to 12 panels and produces between 10 and 13kWh daily.

How many solar panels are installed in Canberra?

We've installed more than 2,600 solar energy systems in Canberra since opening doors here, including the office of Attorney General, Prime Minister & Cabinet Department. So, if you want the solar panels Canberra trusts, call our experienced team today.

How can Canberra homeowners benefit from a solar installation?

When looking into a solar installation Canberra homeowners have a number of schemes they can take advantage of. Along with the previously mentioned Next Generation Energy Storage program, there is also the Sustainable Household Scheme, the Solar for Low Income Program, as well as the nationally available rebates such as STC's.

How do I install solar power in Canberra?

There are a few important steps involved in the solar power installation process in Canberra. The first step includes the application for permission to build a PV solar power grid on your business or residential property.

The company manufactures and markets solar power products such as silicon ingots, silicon wafers, solar modules, solar PV cells, and monocrystalline, and multi crystalline photovoltaic (PV) panels.
