What certifications do you need to ship a lithium battery?

In order to ship ANY lithium battery products via air freight, the UN 38.3 test must be passed by the battery packs. Additionally, IEC testing includes CB certification, and both IEC and UL testing must be done after the transportation certification is complete.

What are the UL Certifications for lithium batteries?

2. Battery certification for the U.S. market UL Certification: UL1642 for battery cells, UL2054 for battery pack Safety requirements for the transport of Lithium batteries (UN38.3 and 1.2 meter drop test) battery-related Environmental Regulations (US Battery Directive) primarily test for lead and mercury.

What is the IEC62133 battery pack certification?

The IEC62133 battery pack certification is an international standard for the safety of rechargeable lithium batteries. The latest standard for this certification is IEC62133-2:2017 for lithium battery packs. This is the most widely accepted test standard for lithium batteries.

What are the packaging requirements for lithium batteries?

The UN38.3 certification outlines the packaging requirements for lithium batteries classified as dangerous in Class 9. Section II of the UN38.3 standard includes three packaging instructions: PI965: This instruction applies to lithium batteries that are packed with equipment.

What are the safety requirements for lithium batteries?

Safety requirements for the transport of Lithium batteries (UN38.3 and 1.2 meter drop test) battery-related Environmental Regulations (US Battery Directive) primarily test for lead and mercury. 3. Battery certification for the EU market Battery instructions: 2006/66/EC Pb: 40PPM, Cd: 20PPM, Hg: 5PPM.

What are battery pack certifications?

Battery pack certifications are near universal standard industry practice for leading companies in the electronic industry. They are an independent means of assuring that products are safe, and are focused on product safety.

The standard IEC 62133 distinguishes between Nickel and Lithium-Ion cells and batteries. Depending on the chemistry and type (cell or battery pack) several different tests ...

Since this is a lithium-ion battery pack, you need not completely discharge it before recharging. It can be recharged at any point. However, since the maximum number of charge cycles is approximately 300 times (battery life based on Canon's testing standards), you are recommended to charge the battery pack after having discharged it completely to prolong battery life.
