Does AEC offer a 1200kva ups?

New powers also available in a single 1200kVA UPS solution with 10 125kW modules. UPS,uninterruptible power supplies,are the main business of AEC,which thanks to its significant investments has always managed to offer products of the highest quality and reliability.

What are the benefits of a decentralised UPS system?

Maintenance-free Supercaps, long-life and safe LiFePo4 and lithium-ion battery packs or classic lead-acid batteries go into action. Our decentralised UPS systems provide effective protection against power failure, flicker, fluctuation or voltage drops in DC power supplies.

Who is AEC ups?

The AEC group has specialized for more than 50 years in the production of uninterruptible power supplies for the protection of the power supply of industrial plants. AEC UPS specializes in the production and marketing of the uninterruptible power supply,essential for guaranteeing electricity.

How does an uninterruptible power supply work?

In uninterruptible power supplies online, the batteries are always connected to the inverter and in the event that there is a power voltage drop or a blackout, the converter disconnects from the circuit and the batteries come into play, which keep the power supply stable. and without fluctuations.

What are the most advanced uninterruptible power supplies?

The most advanced uninterruptible power supplies are modular technology,made up of hot-swappable modules,and redundant to each other. A completely modular technology guarantees constant redundancy of the UPS,and thanks to the possibility of expansion in the future it reduces the total cost of ownership.

Why should you choose an IFP series ups?

It is ideal for PC users or small business companies,as well as for small telecom applications. The iFP series is equipped with AVR to reduce the impact of unstable voltage on equipment. The intelligent UPS' functions can also provide power during outages,and the battery automatically charges when power is restored.
