When you think of a solar powered home, you will naturally think of solar panels sitting on a roof. That is certainly accurate for the majority of residential solar systems, but there is much more to a home solar system than ...

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,00 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.
