What is the price of electricity in the Congo?

Democratic Republic of the Congo, September 2022: The price of electricity is 0.080 U.S. Dollar per kWh for households and 0.093 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

What percentage of Congolese people have access to electricity?

Less than 10% of the Congolese population has access to electricity, 35% in urban areas (50% in Kinshasa) and less than 1% in rural areas. There are also strong regional disparities in access to electricity. But, Congo has an immense development potential thanks to abundant hydrological and solar resources.

Should DRC receive electricity via the National Grid?

Electricity in the DRC should receive electricity via the national grid. Grid power can serve a more geographically diverse spread of customers, despite the fact that the bulk of the solar PV is located in the southeast and wind in the east of the country. Distributed generation in various forms, however

How much power does DRC need?

Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing off-grid power or 16 GW of installed solar capacity! Same applies to clean water as only 23% have access.

How much of DRC's population has access to electricity?

As little as 13.5% to 16% of the population has access to electricity. This hampers the country's economic development and leaves millions impoverished; it also hampers industry and the mining sector. For decades, the DRC government has prioritized the development of the proposed Inga

Will solar and wind power be cost-competitive in DRC?

Solar and wind will provide affordable, cost-competitive electricity. Solar PV and wind power would be cost competitive in DRC, with nearly 60 GW of solar PV potential located along existing transmission lines at a total of LCOE of less than 6 U.S. cents per kWh. In addition, nearly all
