JT: Glass is much less flammable than polymeric materials. From a fire safety perspective, that's why we passed as a Class A fire-rated module. One of the common concerns with a silicon module is a microcrack. Having a glass panel, front and back, gives better mechanical protection during transportation and installation.

In the dynamic world of solar energy, the efficiency and longevity of your solar panels hinge not just on the panels themselves but also on the often-overlooked heroes of installation: the clamps. Choosing the right "clamps for solar panel" installations is crucial in ensuring your solar array stands the test of time and elements. Whether it's the versatile "U ...
