

Dublin Container Outdoor Power Supply

Does powerCON provide shore power solutions for container terminals?

Over the recent years, PowerCon has started to supply shore power solutions for container terminals. Creating a new project named "PowerFlex", PowerCon set out to design and implement low-cost and flexible shore power supply for container ships and include onboard battery charging into the system design.

What are the benefits of a containerized shore power system?

The benefits of a containerized shore power system are many. Most importantly, the containers allow us to pre-manufacture, pre-assemble, and pre-test our solutions in our factory, instead of onsite. Here, the containerized design also ensures easy and fast installation.

What makes IGUs a reliable shore power supply system?

A reliable, robust and flexible shore power supply system from igus is therefore used. A harnessed e-spool is integrated in a three-metre long container that can be handled by forklifts to position the system along the various berths.

What types of power supplies can be provided?

A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof. Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery.

What's going on in container and passenger ports?

Ships arriving and departing, containers and merchandise being loaded and unloaded, countless people on the job: there's always a lot going on in container and passenger ports. Our solutions let you reliably supply power to container ships and terminals, large passenger ships, yachts, and boats of all sizes.

What types of vessels does powerCON cover?

PowerCon supplies both high and low voltage shore power solutions and covers all vessel types, from the largest cruise ships to container ships to smaller fishing vessels and ferries as seen from some of our main references below.
