Operationalizing power pools: Overview of Africa's power sector zElectricity consumption patters are as follows: - Africa's share in world's electricity consumption is $\leq 3\%$ - Africa's average was ≈ 500 kWh/cap in 2001 and 2002, - North African countries reached 1000 kWh/cap in 2002. - South Africa consumed more than 4000 kWh/cap in 2002

The southern and northern regions are relatively better off, while the central and eastern regions lack a stable power supply. North Africa has the best power infrastructure and still mainly relies on fossil fuels at present. In recent years, increasing attention has been paid to the development of renewable energy.

Project Factsheet. Name: East Africa Electric Highway. Capacity: 2,000MW. Length: runs for 1,045 km between Wolayta-Sodo in Ethiopia and Suswa in Kenya. Countries: connects Ethiopia, Kenya, and Tanzania. Technology: utilizes High Voltage Direct Current (HVDC) to cut energy wastage and power losses over long distances. Environmental impact: ...
