At full capacity 200w inverter will use 25% more amps than 150w inverter. You can use this formula to calculate the amps or current drawn by any inverter of any capacity. $\text{Current (amp)} = \text{Watts/Volts}$ For example, if your inverter is 200 watts and has a voltage of 10v then the current drawn will be $= 200w / 10v = 20amp$

Make sure to check the inverter's manual for the best wire size for your use. The right wire will fit your solar inverter power ratings perfectly and avoid energy loss from your inverter compatibility with 200w solar panel. ...

Although 200W is a low-power inverter, it is also capable of running most small electrical devices in the home. When the family is camping, choosing to buy a 200W inverter is a good choice.
