

Is outdoor power available in Lagos Nigeria

Which energy sources are used in Lagos?

The two independent DisCos (EKEDC and IKEDC) currently supply about 1,000 MW to Lagos, which is insufficient to meet the city's energy needs. Therefore, on-site, off-grid generators are a major energy source for Lagos, with most being conventional fossil-fuel-based generators.

Is Lagos Power Plan a beacon of hope for other states?

The Lagos power plan's potential extends beyond Lagos, serving as a beacon of hope for other states across Nigeria. Its innovative approach, blending traditional and renewable energy sources, offers a blueprint for replicating its success elsewhere. Read also: Large scale theft robs Nigeria of electricity

Could Lagos electricity market double the size of Nigeria's economy?

Nigeria's commercial capital currently generates an estimated 15,000 megawatts (MW) of electricity through diesel generators but a mix of gas-sourced power with off-grid solutions means that the Lagos Electricity Market plan could potentially double the size of the state's economy.

How much electricity does Lagos State need?

These bottlenecks, states can overcome, now with their fate in their hands. According to Lagos State Electricity Board, LSEB, Lagos State needs between 10,000 to 12,000 megawatts of electricity in the next decade, which is about 90 percent of the current national installed 13,000 megawatts capacity.

What is the Lagos Power Plan?

The Lagos power plan seeks to use available energy sources in the state - gas and renewable energy sources - to attain at least 18 hours of supply daily over five years with growth in peak energy traded in the state, from 12,000-15,000 MWh daily in December 2022 to 81,000 MWh by June 2028.

What is the Lagos State Electricity Policy?

In December 2021, the Lagos State Government unveiled the Lagos State Electricity Policy,²⁴ which is aimed at "providing cleaner, reliable, affordable and uninterrupted power supply to residents".²⁵ It was based on an interpretation of Section 14 of the 1999 Constitution, which was confirmed by the Senate in 2022 (see above).
