Why is Hyundai launching a battery plant in Indonesia?

Hyundai and LG Energy Solution have opened a \$1.1bn battery cell plant in Indonesia as the south-east Asian country works to build an electric vehicle ecosystem. The launch of the country's first battery plant on Wednesday is part of Indonesia's push to move up the global EV supply chain.

Where is Indonesia's first electric vehicle battery plant?

(AFP Photo) At Indonesia's first electric vehicle battery plant, the first in Southeast Asia, rows of robotic arms precisely move to assemble nickel-based battery cells on the production line.

Where are EV battery cells made in Indonesia?

A worker moves battery cells to be packed for shipment at the battery manufacturing plant at PT HLI Green Power, Indonesia's first EV battery cell manufacturer, Karawang, West Java, Indonesia, Aug. 28, 2024. (AFP Photo)

Will Indonesia produce EV batteries by 2024?

And Chinese automaker Wuling announced a plan last month to produce EV batteries at its Indonesia factory by the end of 2024, local media reported. "We see a huge potential for EV purchase in Indonesia compared to other countries in Asia," said BYD Indonesia official Luther Panjaitan.

Who inaugurated Indonesia's battery and electric vehicle ecosystem in 2024?

JAKARTA, KOMPAS -- President Joko Widodo inaugurated Indonesia's battery and electric vehicle ecosystem in 2024 at PT Hyundai LG Indonesia or HLI Green Power, Karawang, West Java. This factory is the first and largest battery cell factory in Southeast Asia.

Can Indonesia make a battery industry?

"It is possible to make a battery industry in Indonesia. That is what Thailand and Vietnam don't have," he said. However, the burgeoning industry faces challenges. While Indonesia aims to become one of the world's top three producers of EV batteries, investment in the sector remains relatively small.
