

Lesotho Emergency Portable Power Supply Customization

Who supplies electricity in Lesotho?

LEC is the sole supplier of electricity operating within Lesotho. In the present day, LEC remains the first parastatal in the country with the obligation to supply power to all customers within its service territory.

What is emergency power supply?

An emergency power supply is an alternative source of electrical power. They are mostly used in case of power cuts to power your essential electrical and electronic devices. For example, solar energy is the best option for emergency power generators.

What are the different types of emergency power supplies?

There are mainly three types of emergency power supplies available to consumers. These include emergency solar power, gas generators, and portable power stations. Of the three, solar power is the most cost-effective power source in the long term. Besides, portable power stations are also welcomed because of their compact size and portability.

How much power does an emergency power supply need?

The emergency power supply must have a power rating of at least 1500 watts. It should have voltage, current, and short-circuit protection. If the emergency backup power supports a combination of batteries and solar panels, that would be an added advantage. See how many devices it can power at once.
