How will the European Union support Libya's energy transition and climate resilience?

With a firm commitment to supporting Libya's energy transition and climate resilience efforts, the European Union has allocated funding to GIZ and UNDP to implement transformative projects to enhance Libya's capacity in renewable energy and energy efficiency and mitigate and adapt to climate change.

Does Libya have a power supply?

Libya has rich oil and natural gas reserves that are used to produce power. At present, renewable energy sources play scarcely any role in the country. However, violent conflict is threatening the population's power supply: the existing power grid is damaged due to a lack of maintenance and acts of sabotage.

Why is UNDP partnering with Libya?

UNDP Libya Resident Representative a.i., Dr. Christopher Laker, stated, "This pivotal partnership arrives at a critical juncture for Libya, as urgent action is needed to mitigate the extensive impacts of climate change.

This interview covers METLEN's expansion plans in the MENA region, particularly in Libya, their contributions to Libya's energy transition through green metallurgy projects, future investment and development plans aligned with Libya's national energy strategy, and the ...

The project is also in line with the country's political leadership vision to transform Egypt into a regional energy hub," said Hussein Fouad El Ghazzawy, former Vice President and Managing Director for Egypt and East Mediterranean at Schlumberger, who worked both in Egypt and Libya, among other countries, during his 34-year tenure at ...
