How much does a lithium ion battery cost?

Run &NEFW> on your Terminal or contact your sales representative. BloombergNEF's annual battery price survey has found that the volume-weighted average price for lithium-ion battery packs was \$115 per kilowatt-hour (kWh) this year. This is a 20% drop year-on-year, the biggest since 2017. Cell manufacturing...

What is the difference between lithium ion battery prices and nickel prices?

Data until March 2023. Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors. Nickel prices are based on the London Metal Exchange, used here as a proxy for global pricing, although most nickel trade takes place through direct contracts between producers and consumers.

How much does lithium iron phosphate cost?

The industry continues to switch to the low-cost cathode chemistry known as lithium iron phosphate (LFP). These packs and cells had the lowest global weighted-average prices, at \$130/kWh and \$95/kWh, respectively. This is the first year that BNEF's analysis found LFP average cell prices falling below \$100/kWh.

How much does a battery cost in 2023?

The figures represent an average across multiple battery end-uses, including different types of electric vehicles, buses and stationary storage projects. For battery electric vehicle (BEV) packs, prices were \$128/kWh on a volume-weighted average basis in 2023. At the cell level, average prices for BEVs were just \$89/kWh.

How much will lithium-ion batteries cost in 2022?

After more than a decade of declines, volume-weighted average prices for lithium-ion battery packs across all sectors have increased to \$151/kWh in 2022, a 7% rise from last year in real terms. The upward cost pressure on batteries outpaced the higher adoption of lower cost chemistries like lithium iron phosphate (LFP).

What is the demand for lithium-ion batteries in 2024?

That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF. While demand across all sectors saw year-on-year growth, the EV market - the biggest demand driver for batteries - grew more slowly than in recent years.
