

Outdoor Power Supply in Rotterdam Netherlands

How to introduce onshore power in the port of Rotterdam?

To further introduce onshore power in the port of Rotterdam, we are conducting four studies in preparation for Onshore Power Supply systems (OPS). This takes place at four large terminals in the port of Rotterdam; the ECT (Amazonehaven), APMT2 (Amaliahaven), VOPAK (Botlek) and the Cruise terminal (Wilhelminakade).

Is Rotterdam a future-proof port?

This way, Rotterdam is taking steps towards an increasingly cleaner and future-proof port. To further introduce onshore power in the port of Rotterdam, we are conducting four studies in preparation for Onshore Power Supply systems (OPS).

Does Rotterdam need shore power?

1 The Port of Rotterdam Authority's public berths for inland shipping, port tugs and sea shipping must have shore power by 2027. 2 According to the EU, container, cruise and passenger terminals must be equipped with shore power by 2030. The Port Authority supports this and encourages the terminals to meet this so-called AFIR obligation.

What is the port of Rotterdam shore power programme?

On the one hand, the shore power programme is aimed at realising and operating shore power at the Port of Rotterdam Authority's public berths. Additionally, the programme is working to achieve the right preconditions for terminals and shipping companies in the port area to enable the switch to shore power.

How will solar and wind power supply a port & Europe?

In combination with the expansion of solar and wind production, these energy plants will continue to play a vital role in the future to supply the port, the Netherlands and Europe with electricity. We are working on various plans to make CO₂-free energy and electricity supply possible.

What is the port of Rotterdam focusing on?

To achieve this, the Port of Rotterdam Authority is focusing on three areas: 1 The Port of Rotterdam Authority's public berths for inland shipping, port tugs and sea shipping must have shore power by 2027. 2 According to the EU, container, cruise and passenger terminals must be equipped with shore power by 2030.
