

# Outdoor power supply increased

What is the global outdoor power equipment market size?

The global outdoor power equipment market size was estimated at USD 53.42 billion in 2024 and is projected to grow at a CAGR of 6.3% from 2025 to 2030. The market growth can be ascribed to the increasing demand for cordless outdoor power equipment as people are more inclined toward greater flexibility and portability.

Why is the North America outdoor power equipment market growing?

The North America outdoor power equipment industry accounted for 35.28% of the global overall market share in 2024. The regional market's growth is attributed to North America's larger geographical area compared to its population, which leads to more gardens and lawns in the region.

Why is the maintenance cost of outdoor power equipment so high?

The factors to be reviewed regularly include inspecting cords, checking for damaged switches, sharpening, oiling, and other repairs needed for properly working the equipment. Hence, the maintenance cost of outdoor power equipment is relatively high, which is expected to hamper the market's growth.

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

What drives the UK outdoor power equipment industry?

The UK outdoor power equipment industry is driven by a strong gardening culture, rising popularity of allotments and urban green projects, increasing demand for electric and battery-powered tools due to strict emission laws, and growing investments in smart, automated lawn care solutions.

What are the key companies in the outdoor power equipment industry?

Some of the key companies in the outdoor power equipment industry include Husqvarna Group, Makita Corporation, Honda Motor Co., Ltd., Briggs & Stratton, and others. Organizations are focusing on integrating advanced technologies into their offerings to maintain competitive advantages.

With the increase of people's outdoor camping activities, outdoor power supply is the best choice to realize the freedom of electricity. The outdoor power supply can easily supply power for laptops, photography lights, ...

Low power supply temperatures can: Increase the output ripple: The cold can add noise into the system and cause the output voltage ripple to increase, ... Take traffic control, for instance. Power supplies need to be housed outdoors, where the extreme heat of the summer and the extreme cold of the winter will both be
