What is the best outdoor portable power station?

For the ultimate in outdoor portable power, we recommend the Goal Zero Yeti 1400 Lithium power station. It can recharge a smartphone over 70 times and a laptop over 20 times. Additionally, it can power a refrigerator for over 23 hours or a 32-inch LCD television for 14 hours.

What can a portable power station power?

Portable power stations can power laptops, radios, and even small appliances while on an extended expedition to some far flung destination. These charging options come in the form of tiny battery packs designed to keep a mobile device operational for a few extra days to portable power stations.

How long does a power station last?

Power stations with more watt hours can run for longer. Exactly how long depends on the amount of watts the devices connected to the power station draw. You can roughly estimate how long a power station will last by dividing the amount of watts devices are drawing from it by its watt hours.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

Are portable power stations worth it?

This power station offers a lot of bang for the buck. Sure, it isn't going to power your house through a days-long outage, but it offers a lot of nice features for the price, making it one of the better values out there, especially if you can pick it up on sale. How long do portable power stations last?

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.
