It's the same for energy and power - you need both, but usually one makes more sense than the other. Newbies to energy often try to use energy (kWh) for everything (sometimes calling it kW by accident), but more experienced folks tend to use power (kW) a lot more. The equation connecting energy and power

3. Interconnection Facilities between Main Incoming Circuit Breakers (MICB) Where the supply is designed to be taken from more than one transformer, a 4-pole circuit breaker of not less than 1600A shall be installed to provide interconnection facilities.
