PV inverter field shipments

Which PV inverter vendors shipments grew the most in 2022?

The top five vendors - Huawei, Sungrow, Ginlong Solis, Growatt, and GoodWe - shipped more than 200 GWac and accounted for 71% of total global PV inverter shipments in 2022, growing 8% from 2021. Huawei's shipments saw a significant increase of 83% in 2022 compared to 2021, while Sungrow's shipments expanded 56% in the same period.

What is the global PV inverter market share?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market, according to Wood Mackenzie's 'Global solar inverter and module-level power electronics market share 2024' report.

How did global PV inverter shipments grow in 2023?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023,reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market.

How many solar inverters were shipped in 2022?

As a result, the total global shipments of PV inverters reached 333 GWacin 2022. Among the top five vendors, Huawei, Sungrow, Ginlong Solis, Growatt, and GoodWe, more than 200 GWac was shipped, accounting for 71% of the total global PV inverter shipments in 2022. This represents an 8% increase compared to the previous year.

Which inverter vendors dominated the global photovoltaic market in 2022?

Huaweiand Sungrow remained market leaders in 2022, as they have done since 2015, while AISWEI and SOFAR entered the top 10 ranking. The top 10 global photovoltaic (PV) inverter vendors accounted for 86% of the market - an increase of 4% year-over-year, whereas the top 3 players captured 60% of the market share for shipments in 2022.

Why is PV inverter market booming?

...

The report reveals that the top 10 PV inverter vendors accounted for 86% of the market share, representing a 4% increase from the previous year. The strong growth in PV inverter shipments can be attributed to the increased global demand for solar energy, which rose to 201 GWac in 2022.

The Chinese conglomerate and inverter maker shipped 2 GW of storage systems last year. In 2020, total PV inverter shipments totaled 41.7 GW, according to Huawei's smart PV business sector. Sungrow, another solar

SOLAR PRO.

PV inverter field shipments

Shipments of solar photovoltaic (PV) inverters and optimizers were estimated to reach 113,000 megawatts alternating current worldwide in 2020. Central solution and residential/commercial...

After a challenging 2024, marked by high inventory levels and declining residential demand, the inverter market is set to recover in 2025. Global inverter shipments are expected to increase 7% to reach 570 GW alternating ...

Global solar photovoltaic (PV) inverter shipments reached a record high in 2022, surpassing 330 gigawatts (GWac), according to a recent analysis by Wood Mackenzie. The ...

Shipments of solar photovoltaic (PV) inverters and optimizers were estimated to reach 113,000 megawatts alternating current worldwide in 2020.

China's solar power landscape witnessed a surge in 2023, with 216.88 GW of new installations, showcasing a 148.12% year-on-year increase, as per the latest data from the National Energy Administration (NEA). This surge ...

About Sungrow . Sungrow Power Supply Co., Ltd. ("Sungrow") is a global leading PV inverter and ESS provider with over 515 GW of power electronic converters installed worldwide as of December 2023.

In 2021, global solar PV inverter shipments added up to 225.286 GW AC in 2021, having grown 22% or 40.25 GW AC on annual basis, thanks to strong growth supported by government policies in the markets of Europe, India and Latin America, says Wood Mackenzie. ... On Wood Mackenzie's list, two other Chinese companies complete top 5 - and the ...

The conference brought together leaders in the field of solar energy, entrepreneurs and heads of investment institutions. ... PVBL's annual ranking of the Top 20 Global Photovoltaic Inverter Brands was announced. ...

The world"s top 10 solar inverter providers accounted for 86% market share in 2022, a year where the market saw a 48% increase in size year-on-year (YoY).

The top five vendors - Huawei, Sungrow, Ginlong Solis, Growatt, and GoodWe - shipped more than 200 GWac and accounted for 71% of total global PV inverter shipments in 2022, growing 8% from 2021. Huawei's ...

Global inverter shipments increased to 330 GW last year with Huawei, Sungrow, Ginlong, Solis, Growatt and GoodWe named as the top vendors. The top 10 global solar inverter vendors accounted for 86% of market ...

TBEA"s produces power transmission and transformation equipment whose scope covers transformers, cable& wires, converter valves, switches, secondary equipment and bushings which integrated whole industry chain in power transmission and transformation area. whose products are widespread in power grid, new

PV inverter field shipments

energy, high-speed train, subway ...

Sineng Electric is a global leader in power electronics, specializing in the development and production of advanced photovoltaic (PV) inverters, energy storage inverters, and digital power products. Committed to delivering world-class, all-scenario solar-plus-storage solutions, Sineng is at the forefront of driving innovation within the clean ...

International authoritative research institution IHS Markit (part of S& P Global) announces the top 10 global solar inverter shipments for 2021 with Ginlong (Solis) taking the No.3 position. According to the research, Solis not only leads the distributed inverter shipments in relevant regions around the world but also for the first time ranks ...

China's JinkoSolar was the world's largest PV module supplier in 2023, with 78.5 GW of global shipments... In its financial results for 2023, the company said that its panel shipments increased by ...

SOLAR INVERTER MARKET REPORT OVERVIEW. Solar Inverter Market Size was estimated at USD 15899.4 million in 2024 and it is expected to grow from USD 17314.45 million in 2025 to USD 20533.57 million by 2033. The Market CAGR (growth rate) is expected to be around 8.9% during the forecast period (2025 - 2033).

After a steep decline in inverter shipments in Q4 2023, Solaredge has started the first quarter of 2024 with an increase to 946MW. ... Overall, the solar inverter supplier expects sell-through of ...

After a challenging 2024, marked by high inventory levels and declining residential demand, the inverter market is set to recover in 2025. Global inverter shipments are expected to increase 7% to ...

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the ...

In 2020, total PV inverter shipments totaled 41.7 GW. Longi reported this week its revenue grew by 48% to CNY 80.9 billion (US\$12.4 billion) in 2021. Its profit, however, declined by 6.2% to CNY 9 ...

The world"s top 10 solar PV inverter manufacturers accounted for 86% of the total market share in 2022, according to new figures from energy analysts Wood Mackenzie, as global shipments increased to more than 330GW.

Wood Mackenzie noted that the top five vendors shipped more than 200 GWac and accounted for 71% of total global PV inverter shipments in 2022, up 8% from 2021. The report notes that 2022 top vendor Huawei ...

Overall, global PV inverter shipments saw 48% growth year-over-year in 2022, with an additional 100 GW shipped from 2021. Improvements in chip shortages drives growth. In 2022, the PV inverter industry saw a

PV inverter field shipments

renewed ...

The global PV demand of 201 gigawatt alternating current (GWac) in 2022 contributed to 48% growth year-over-year for PV inverters. In terms of inverter shipments, strong growth in Europe, Asia Pacific, and the United States where government support bolstered to meet clean energy goals led to a total of 333 GWac of global shipments in 2022. The ...

Globally, PV inverter shipments have witnessed a 56% rise to reach 536 gigawatts of alternating current (GWac) in 2023, indicating strong

Solar microinverters are forecast to account for 31% of the module-level power electronics (MLPE) market in 2023, with power optimizers expected to account for the remaining 69%. Key market drivers include booming demand in European markets, especially in distributed generation (DG) solar, and continued demand in the United States for rapid shutdown ...

SMA"s PV inverters have a wide power range from 700W to 1,120MW. In 2015, its PV inverter shipment amounted to 7.3GW, representing a 43.7% increase over the same period of last year. Huawei entered the PV field in 2012 and became the largest PV inverter manufacturer by shipment in China and the world in 2015. In January 2016, the company ...
