

Sana Outdoor Power Agent

What is agents in Sana agents?

The Agents feature in Sana Agents is designed to enhance user productivity by providing AI-driven support tailored to specific tasks and knowledge areas. This innovative tool offers improved transparency, usability, and customization options, making it an essential component for streamlined workflows and efficient task management.

How do I create a Sana agent?

Permission management: Users can manage permissions to decide who can chat with or edit the agent. Workspace admins can pin a default agent for all users, ensuring consistency and accessibility across the organization. To create a new agent, click on the Agents button on the left panel of Sana Agents. Click Create.

Why should you use Sana?

"Sana gives us control over the AI, allowing us to choose the material it accesses and tailor its parameters to our specific needs." Our most popular integrations incl. Asana, Gmail, Outlook email, Zendesk, and more. "We're leveraging our AI agents to find and compare product information, build sales arguments, support R&D, and much more.

How does Sana work?

To go beyond basic question answering, Sana understands the user's intent and acts accordingly. This requires reasoning in multiple steps about what knowledge sources are relevant, how they should be combined, and what action should be taken based on the synthesized result.

Why do organizations choose Sana?

It isn't all about the technology. Organizations choose Sana because we're product-led and partnership-driven. "Sana gives us control over the AI, allowing us to choose the material it accesses and tailor its parameters to our specific needs." Our most popular integrations incl. Asana, Gmail, Outlook email, Zendesk, and more.

How does Sana work in slack?

With Sana you can configure your assistants to act on tasks directly from tools like Slack and Salesforce. "Asking Sana in Slack for someone's actions from the last meeting, or our definition of retention--it's a game-changer." To go beyond basic question answering, Sana understands the user's intent and acts accordingly.
