

Selling home solar lights

Should you sell a home with solar panels?

An experienced agent will understand the ins and outs of selling a home with solar panels in your market, know how to find the right buyer, and help you get top dollar. When selling a home with leased solar panels, you must either transfer the lease to your home buyers or purchase the panels from the solar company to conclude the lease early.

Are solar panels a boon for selling a house?

Data available for 2021 from Rocket Homes shows that homes with solar panels spent 13.3% less time on the market than homes without solar power. In other words, solar panels could be a boon if you're looking to sell your home quickly. There's a pretty defined timeline for selling a house, and certain steps in the process are going to take longer.

How do you sell solar panels?

For a smooth sale, collect all of your essential documentation (purchase receipts, warranty information, and records showing energy savings). These documents will provide transparency for buyers and help them take over care of the panels seamlessly. When solar panels are leased, the sellers of the home don't own the solar system: The lender does.

Should you buy out solar panels?

When you own the solar panels, you remove the solar lease from the home sale equation and boost your home's market value. To decide if buying out the panels is a practical option for you, compare the purchase offer to the estimated value owned solar panels add to homes in your market.

Should you buy out a solar lease?

Some solar lease contracts include an early buy-out option, allowing you to buy out the remainder of the lease and own the solar panels outright. When you own the solar panels, you remove the solar lease from the home sale equation and boost your home's market value.

Should solar panels be inspected before selling a home?

Even better: Sellers can have solar panels inspected in advance, fix any problems before putting the home on the market, and then present potential buyers with the report, Tanner said. Ultimately, the issue is rarely the solar panels themselves, but a lack of education.

In our Yonkers, N.Y., facility, we mount samples of each light on a mobile cart that we park outdoors for roughly 5 hours every day. We test on both sunny and cloudy days.
