

Slovenia computer room UPS uninterruptible power supply manufacturer

Who makes ups?

We offer a comprehensive range of UPS devices from leading manufacturers such as APC, Eaton, Riello UPS, Socomec, and Vertiv for all your backup power requirements. Our team of in-house UPS engineers have extensive manufacturer experience and will ensure you receive the best service possible.

What is an ups & how does it work?

UPS units are emergency power supplies that ensure uninterrupted power delivery. In the event of a power surge or outage, the UPS takes over as the primary power source. This allows, for example, the saving of current projects and the safe closure of documents. A UPS protects hardware components from the negative effects of power surges.

Who makes a good UPS system?

Riello UPS - Riello UPS's award-winning range of products includes solutions for businesses of all types and sizes. Socomec - Founded over 100 years ago, Socomec is a pioneer in power solutions. APC - A flagship brand from Schneider Electric, APC offers UPS systems to suit any need.

What are high-performance uninterruptible power supplies?

High-performance Uninterruptible Power Supplies - ensure that your equipment will always work regardless of voltage spikes and power failures.

Are there alternatives to ups?

There are very few viable alternatives to UPS. Generators can be a suitable solution for back-up power in some circumstances, for example, while central battery systems can be used for emergency lighting and security systems. We also supply other standby power products, including generators and central battery systems.

What are ups power supplies?

UPS power supplies represent a broad category of products, within which every modern-minded customer can quickly find something suitable. Our selection includes UPS units designed to provide power to entire computer networks as well as individual workstations. We invite you to explore our carefully selected and continuously updated range.
