Much like the amount of solar PV, rated horsepower (HP) of pumps can be misleading. For a solar pump, if HP is stated, this usually refers to the maximum solar panel which can be used with the system. If the pump is inefficient and simply using more energy, it doesn't always mean you'll get more flow. Always check both HP and stated flowrates.

The quality and attention to detail we are known for is apparent in the Futurepump SE1.
