

Sync outdoor power supply

How much power can a Philips Hue outdoor power supply withstand?

The bottom line is that the maximum power is a little more than 70 watts, much more than the 40 watt power supply from Philips Hue should be able to withstand. But with a measuring device I was able to make interesting findings. The outdoor power supply seems to have enough reserves.

What if my power supply code is lower than 19?

Your power supply may be affected if the first two digits (i.e. the year) are lower than 19 or the following two points apply: For example, a power supply unit with the code 1835 is affected, but a power supply unit with the code 2005 is not.

How do I know if my power supply is affected?

Your power supply may be affected if the first two digits (i.e. the year) are lower than 20 or if the following two things apply: For example, a power supply unit with the code 1835 is affected, but a power supply unit with the code 2047 is not. This means that more power supply units are affected than was assumed a few years ago.

Extension cable for outdoor use: 5 m . The extension cable can be used to extend the space between the power supply and your first light point or to extend the space between light points. Total maximum system length per power supply is 35 metres.
