

Tashkent's new outdoor power supply

How to improve the power supply system of Tashkent?

Therefore, a large-scale program was adopted to radically improve the power supply system of the city of Tashkent. For the needs of the capital, 4 photovoltaic stations with a total capacity of 2,400 megawatts will be built. The first of them, with a capacity of 400 megawatts, is being built in the Kibray region.

What happened to ACWA Power's Tashkent Riverside Project?

Credit: myphotobank.com.au /Shutterstock. Acwa Power has achieved financial closure for the \$533m Tashkent Riverside project in Uzbekistan. The project encompasses a 200MW solar photovoltaic (PV) plant and a 500 megawatt hours (MWh) battery energy storage system (BESS), the largest in Central Asia, aimed at bolstering the Uzbek grid.

What is new Tashkent project?

Within the framework of the New Tashkent project, favorable conditions for living of 1 million people will be created on an area of 6,000 hectares with the provision of appropriate infrastructure. In the capital itself, special attention will be paid to electricity supply.

Where is the PV plant located in Tashkent?

No constraints have been identified along the international transit corridor. The PV plant site is located along the 4R-12 district highway, which links feeder roads within the districts of Yukorichirchik, Parkent and Kibray to the ring road along the outskirts of Tashkent City. The single carriageway is paved and in good condition.

Will a new Tashkent be a page in Uzbekistan's history?

Shavkat Mirziyoyev laid a capsule marking the start of the construction of a new Tashkent. "On the eve of the bright holiday, we are starting construction with good hopes. This will be a new page in the history of new Uzbekistan," the head of state said. For the new city, as well as for the capital, additional energy is needed.

As an outdoor socket will need to be supplied by a 30mA RCD protected circuit, you will need to run your supply cable from the supply (normally the consumer unit) to the install location. If your consumer unit is quite far inside your home then you may need to start drilling holes through walls or running cables up through floors, which can get ...
