How long do power tool batteries last?

Most power tool batteries last between 1 and 3 years, depending on how often they are used. Batteries that are used more frequently will typically need to be replaced more often than those that are used less often. The type of battery also plays a role in how long it will last - lithium ion batteries tend to last longer than lead acid batteries.

Do rechargeable power tool batteries corrode?

When your rechargeable power tool batteries have reached the end of their life do not throw them in the trash. As batteries corrode, their chemicals soak into the soil and contaminate groundwater and surface water. Lithium batteries could even cause a landfill fire. Be responsible and take them to your local hazardous waste pickup.

Why do power tools need a smart battery?

The relentless pursuit of innovation in power tool technology has led to advancements such as brushless motors and smart batteries. These innovations not only extend the lifespan of your tools but also enhance performance through improved energy management.

How do you maintain a power tool battery?

To maintain your power tool batteries, follow these tips: Regularly clean the contacts with a dry cloth to ensure efficient energy transfer. Avoid draining batteries completely before recharging, as this can shorten their lifespan. Instead, recharge them when they reach about 20% capacity.

What voltage should a tool battery be discharged at?

There will always be some voltage left even when the battery pack no longer runs your tools. They are considered discharged at 1.1V per cell. Using the tool is the safest way to discharge these types of batteries. NiMH batteries have a higher capacity, so they hold more power, but they let it out at a similar rate to the Cadmium batteries.

Can you use a high capacity battery in a power tool?

Additionally, try to keep the batteries charged between 20% and 80% to prevent deep discharge cycles that can shorten their life. Using a higher capacity battery (measured in ampere-hours, Ah) in your power tool is generally possible if the battery is from the same manufacturer and is designed to fit the tool.

Similar to old cordless drills, there are various ways to reuse old tool batteries. You can use them to power low-energy devices such as LED lights, or create a portable power bank. ... durability, and ability to provide a consistent power output.
