

Will Turkey impose a tariff on solar panels?

The Turkish government has decided to impose a tariff of \$25 per square meter on solar modules imported from Vietnam, Malaysia, Thailand, Croatia, and Jordan. The Ministry of Trade said last week that it has come up with new provisions for imports of solar panels from Vietnam, Malaysia, Thailand, Croatia, and Jordan.

Which countries will be able to import solar panels?

The Ministry of Trade said last week that it has come up with new provisions for imports of solar panels from Vietnam, Malaysia, Thailand, Croatia, and Jordan. The government has decided that solar modules imported from these countries will be applied a tariff of \$25/m².

Is Turkish government dumping solar panels from Asia?

According to Turkish media outlet Hurriyet, the measure is part of an anti-dumping investigation the Turkish government is conducting on solar panel imports from Asia. If the investigation determines that no anti-dumping practices have been implemented in the countries under scrutiny, the tariffs paid by the manufacturer will be returned.

How much does a solar module cost in Turkey?

All other manufacturers present in the five countries and exporting modules to Turkey are applied the \$25/m² tariff. Their names, however, were not revealed by the Vietnamese authorities. Turkey introduced its first restrictions for solar module imports in April 2020. Its PV cell and module industry has more than 60 manufacturers.

Will the US be able to make Turkish solar panels?

The company said its plan was to produce 500 MW of gallium-doped monocrystalline passivated emitter, rear contact silicon panels and tunnel oxide passivated contact (TOPCon) panels in 2023, before expanding to 1 GW in 2024. It's clear that the United States has potential for Turkish module manufacturers.

Is Turkey 'protecting the national solar module industry'?

Turkish association Günder welcomed to government's decision to "protect the national solar module industry." Turkey introduced its first restrictions for solar module imports in April 2020. The Turkish PV cell and module industry has more than 60 manufacturers. This content is protected by copyright and may not be reused.
