

UPS Uninterruptible Power Supply Dealer in Aarhus Denmark

An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main electricity fails. For home users, a UPS can protect desktop PCs, ...

A UPS, or a uninterruptible power supply, is a device used to backup a power supply to prevent devices and systems from power supply problems, such as a power failure or lightning strikes. A UPS can help prevent power supply problems that can often occur

Include all of the devices the UPS will need to support. If a piece of equipment has a redundant power supply, only count the wattage of ONE power supply. If you are unsure how many watts your equipment requires, consult the manufacturer or power supply specifications in the user manual. Here is an example of an equipment list to verify the load:
