

US Solar Water Pump Wholesale Company

Are solar-powered water pumps a sustainable solution?

Solar-powered water pumps are increasingly popular as a sustainable and cost-effective solution for well, irrigation, and livestock water needs. Solar pumps come in various sizes and types, from small 12V pumps for low gallons per minute requirements to larger systems running off 6-panel solar arrays for commercial agriculture.

Who makes solar water pumps?

WBS began producing water pumps in 1998. In 2008, we independently developed and produced solar water pumps. We have OEM production for more than 200 solar pump dealers around the world. Over the past 10 years, we have produced more than 150,000 sets of solar water pumps that have been exported to other parts of the world.

What is an off-grid solar well pump?

Off-grid solar well pumps are particularly useful in remote areas with limited or non-existent access to electric power. These systems can pump water from a well or other water source to a storage tank, providing a reliable water supply for livestock and irrigation.

Why are solar water pumping systems so popular?

Solar water pumping systems for irrigation are becoming increasingly popular due to their cost-effectiveness and the ability to quickly add a producing well anywhere. These systems use solar energy to power water pumps, which irrigate crops and plants. Livestock require access to clean and fresh water to maintain their health and productivity.

Are solar water pump systems a good choice?

Solar water pump systems are an excellent choice for those who need to pump water from a well, whether for irrigation, livestock, or other purposes. Solar water pumping systems for irrigation are becoming increasingly popular due to their cost-effectiveness and the ability to quickly add a producing well anywhere.
