What is a UPS Power Supply? A uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides you with emergency power to a load when the input power source or mains power fails in cases of power outages or load shedding. A UPS differs from an emergency power system or standby generator as it provides near-instantaneous ...

The 80,000 VA (80 kVA) / 64,000 Watt (64 kW) online pure sine wave battery backup uninterruptible power supply (UPS) and power conditioner with surge protection automatically provides defense against power problems. Give your electronics longer life while protecting them from harmful dirty power problems that may otherwise damage or degrade their performance.

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.

Things to consider when choosing a uninterruptible power supply (UPS) Why you need a UPS (Uninterruptible Power Supply) As the name implies, an uninterruptible power supply is just that: uninterruptible. This means power surges, blackouts, brownouts, and any other power-related problems won"t result in your UPS going offline.
