

Uninterruptible Power Supply for Thai Hospitals

What is an Uninterruptible Power Supply (UPS)?

An Uninterruptible Power Supply (UPS) is an electrical apparatus designed to furnish emergency power even when other sources of input power fail. They are indispensable tools within a huge range of unrelated industries.

Why are uninterruptible power supplies important in the healthcare industry?

Uninterruptible power supplies can be critical to the sustainability of life in the healthcare industry. Medical facilities rely on IT and medical equipment for patient care, and equipment relies on the availability of electrical power systems. This dependence is driven by two power vulnerabilities.

What makes a good ups power supply & hospital generator?

As dependable and uninterruptible power supplies are a must - with a 99.999% operational efficiency - the UPS power supply and hospital generators you choose must be up to the high standards required for the healthcare industry.

Who makes UPS-uninterruptible power supplies?

UPS-Uninterruptible Power Supplies are made by Delta Electronics (Thailand) PCL.

What is a three-phase online modular uninterruptible power supply system?

A three-phase online modular uninterruptible power supply system is a system from the Modulon UPS family that offers scalability and redundancy in a single frame, with a capacity of up to 480 kVA. Delta's UPSs are renowned for their innovation, reliability, and efficiency.

What laws affect hospital power supply?

Legislation exists that directly affects hospital power supply, and what healthcare facilities must comply with. For example, IEC 60364-7-710 applies to electrical installations in medical locations, to ensure the safety of patients and medical staff.

Electricity is a large part of our lives, and a backup power supply is crucial for several industries, especially healthcare facilities. Without a backup power supply, it can mean the difference between life and death in hospitals and other types of healthcare facilities. A backup power supply for healthcare facilities is essential in the event of an emergency.

Delta's Uninterruptible Power Supplies (UPS) solutions are offering power security to support the work of Thailand's COVID-19 frontline medical personnel. The COVID-19 public health crisis has the potential to stretch the capabilities ...

Uninterruptible Power Supply for Thai Hospitals

The majority of hospitals and medical facilities have back-up generators on site, but in critical medical locations - Group 2, Category 4 & 5 - that simply is not enough. Those areas require a UPS unit (Uninterruptible Power Supply) to provide critical cover with an immediate changeover to an alternative power source when required.
