What are solar camping lights?

Solar camping lights are portable lights that contain a small solar panel. When exposed to the sun, the solar panel soaks up its energy and charges a built-in battery, enabling it to deliver power to illuminate the light whenever you need it.

Where to buy solar street lights in China?

How can you charge a solar camping light while hiking?

As you hike along a trail during the day, you can have the camping light clipped to your backpack with the solar panel exposed to the sun. When you're winding down in or outside your tent after nightfall, you can simply turn on the solar camping light you've been charging as you hiked.

What are some charging options for a camping light?

So, having a couple of charging options can be important, just as is always the case with solar. This way, if you have several days of cloudy weather, you can simply plug your camping light into a standard USB port (from the 12V port in your car/RV's dash...or from a larger portable battery bank or solar RV generator) and charge it that way.

Does a camping lamp need solar power?

Here's the thing: You've gotta have light, no matter what happens. Solar power is great, but hedging your bets is even better. Good thing this camping lamp comes with not one or two but five different ways to power up: you can solar charge it, use a USB charger or car adapter, add batteries, or even hand crank it if things are really dire.

Are solar-powered lights a good option for campers?

That's why solar-powered lights are such a great tool for campers who aren't going to be anywhere near shore power hookups -- and campers who simply want to make a difference in their overall carbon footprint.
